Bachelor of Science in Software Engineering

Bahir Dar University, 2025

Relevant Coursework/Projects:

[E-Commerce Website Development](#)

[JibyteAI Website Clone](#)

[#vsnLife Project](#)

Skills

Team work

Risk management

Problem Solving

Time management

Communication

Personal Overview

When one of your devices wants to access a website or communicate with a device on the internet, it sends a data packet to the default gateway (the modem). The modem then routes the data packet to the appropriate destination on the internet and receives the response. It then forwards the response back to the device that initiated the communication.

Experience:

I work a lot of group projects together

I have some team work experience on some tech groups

Certificates

JavaScript, HTML5, CSS, C++(certificates):
Sololearn

Udemy
